DIFFERENTIATION

Why our platform

KOREA AUTO TRADE is designed to reduce issues in cross-border vehicle trading — with live inventory, clear listing data, and a guided purchasing process.

Real-time listing update

New items are published continuously across Hot Deals, Car Listings, Live Auction, and Stand by. Order of posting on each category page will be changed every time when it is reloaded, so you can see all our cars — not only one fixed order.

Transparent listing information

Each posting shows its specs (VIN, transmission, odometer, fuel), condition notes, photos, and video when available — so a decision can be made based on facts, not just guess.

Member offer system

Registered members can submit purchase offers on listings and track them under **My offers**. This creates a clear negotiation history — more than just negotiation by messages which can be erased.

Guided purchasing process

From price check to deposit and shipment, the How to buy flow explains currency options, documents, and shipping responsibility in four clear steps — with less confusion for overseas buyers.

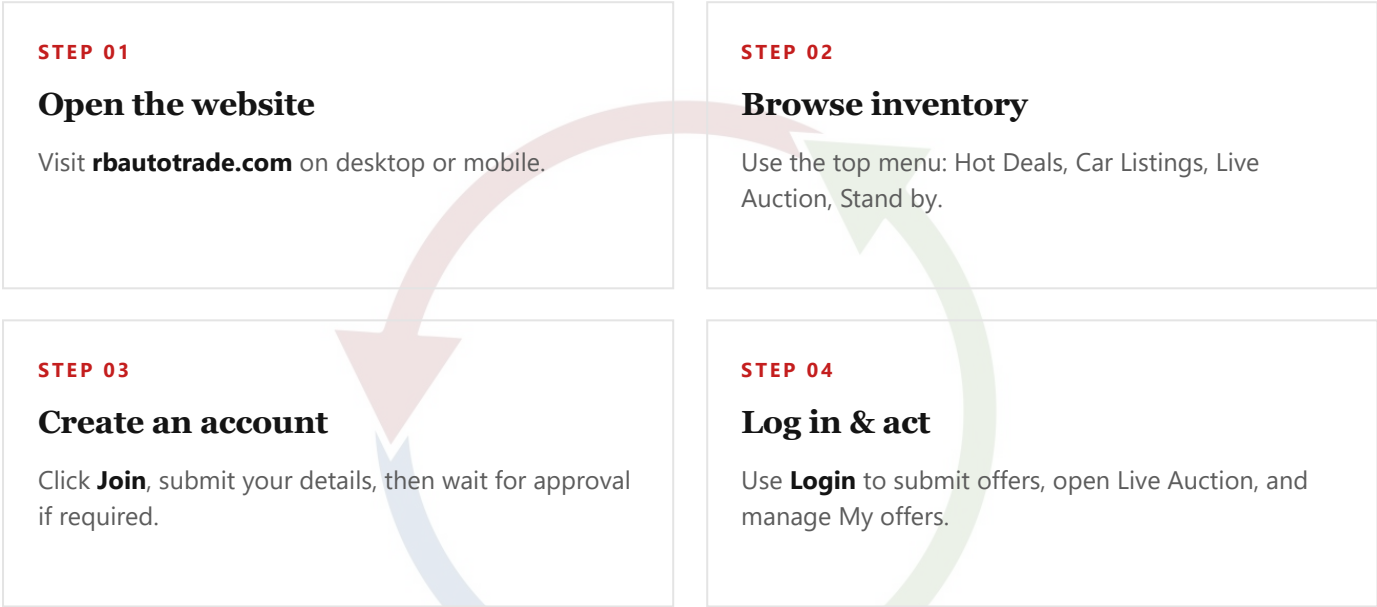

What this means for you

Faster shortlisting, less repeated questions, and a professional process that scales for overseas dealers sourcing from Korea.

ACCESS

Start in three minutes

Most features are usable without registration, except some functions. Registration unlocks member tools such as purchase offers, Live Auction access, and My offers tracking.

Main menu map

Hot Deals	Featured / high-priority units highlighted for quick attention.
Car Listings	Core inventory. Order rotates on each visit, with higher-cost units tending to appear earlier.
Live Auction	Member-access auction listings and offers (sign-in required).
Stand by	Additional ready stock; shuffled on each menu visit for fair exposure.
How to buy	Official 4-step purchase & shipment guidance.
About Us	Company profile, strengths, and all contact channels.

REAL-TIME STOCK

Find vehicles and evaluate units

Use search and category pages to shortlist vehicles, then open a listing for full information.

Search

The top search bar supports manufacturer, model, VIN, serial number (S/N), and notes — useful when you already know a unit reference.

Sale status

Listings may show status such as on sale, reserved, or sold. Reserved / sold units follow platform rules for viewing and offers.

On every listing detail page

- **Vehicle identity** — title, year / manufacturer / model, S/N
- **Key specs** — VIN, engine mark, transmission, odometer, fuel type
- **Condition notes** — comments and notification in English when available
- **Media** — photos and YouTube video (when provided)
- **Direct contact** — WhatsApp, KakaoTalk, Facebook Messenger with vehicle context
- **Member offer panel** — offer history for signed-in members

Transparent specs

Photo + video evidence

One-tap messaging

Offer history

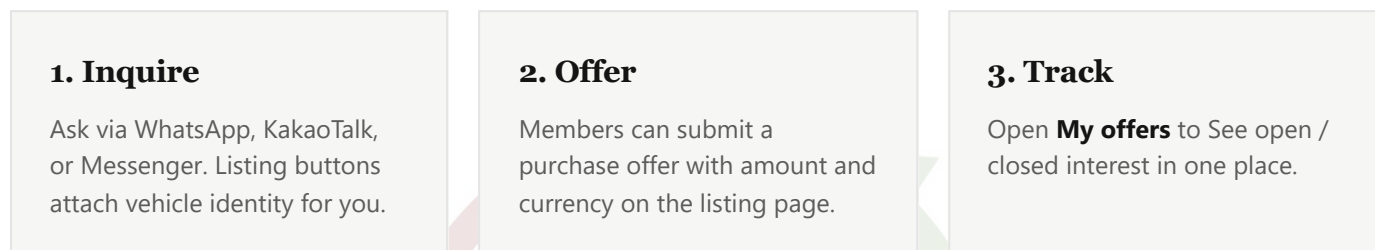

Tip for busy importers

Open the listing → check notes & media first → send WhatsApp/Messenger with the auto-filled vehicle text, or send an offer through the member offer function to make offer history.

PROCESS INTEGRITY

Clear offer and next step

Messages are fast. The platform also provides structured tools so price discussions and follow-up stay organized.

Live Auction (members)

Live Auction listings are available to registered members. Guests see a clear access message with Login / Register options. Once signed in, you can review auction units and participate through the same offer workflow where enabled.

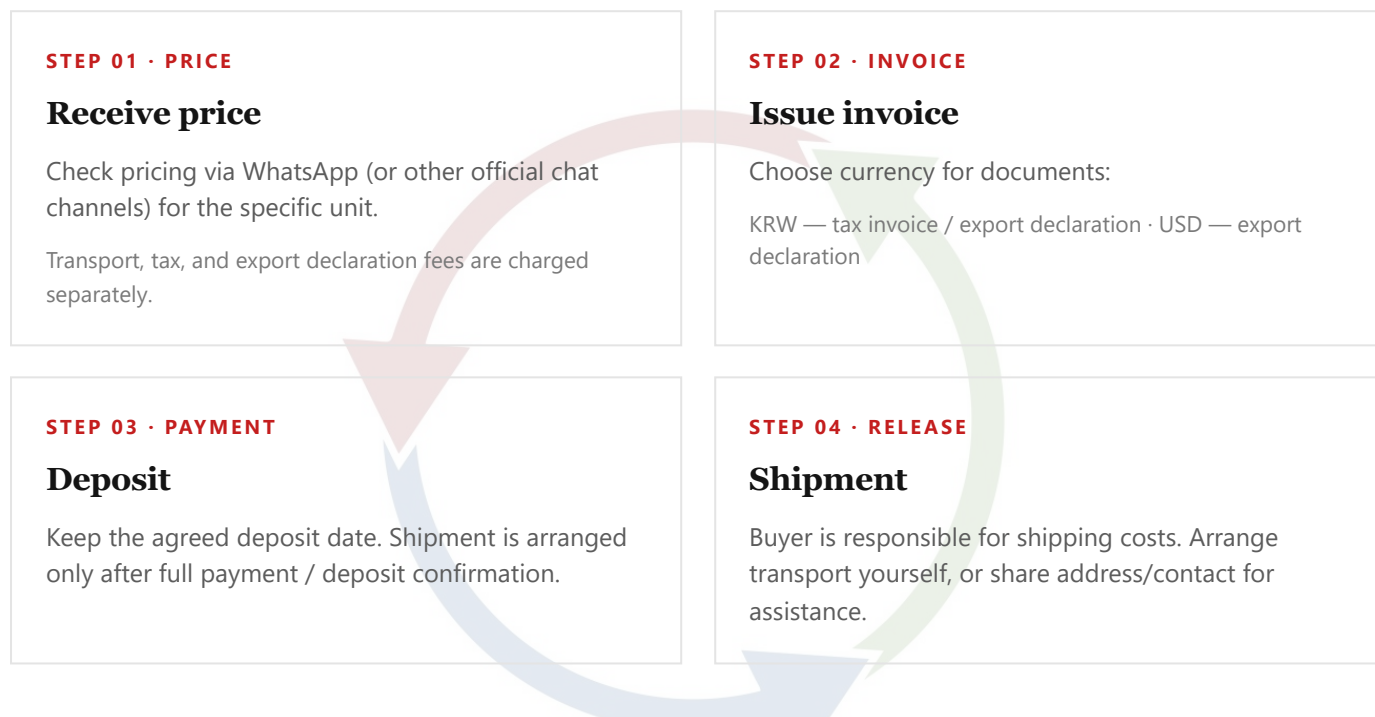

What stays transparent

Listing data	Specs, notes, media, and sale status are shown consistently on each vehicle page.
Communication	Multiple official channels — WhatsApp, KakaoTalk, Messenger, email — with the same contact team.
Commercial path	How to buy explains price check → invoice currency → deposit → shipment release.
Member activity	All offers are stored on your account to follow up and review.

GUIDANCE SYSTEM

Four steps to shipment

Follow this process to make the deal successful. Details also appear on the website under **How to buy**.

Urgent matters

For time-sensitive questions, prefer **KakaoTalk** or **Facebook Messenger** so the team can respond quickly during business hours.

SUPPORT

Official contact channels

Use platform buttons on listing pages when possible — they help identify the exact vehicle.
